About Me

I'm a Gameplay Programmer with experience in Unity and C#. I've published a game and continue to build new projects that challenge my creativity and problem-solving. Recently, I discovered a passion for shaders and graphics programming, and I'm aiming to grow into a more advanced technical role in game development.

Technical Skills

Unity (C#)

AI & Gameplay

HLSL / Shaders

Blender / Maya

Photoshop

Education

FIITJEE International Campus

2019 - 2022 | PCM | 81%

VIT, Vellore

B.Tech. Electronics And Communication Engineering

2021 - 2023 | Dropped Out

IIFA Lancaster Degree College, Bangalore

B.Sc. in Game Design And Development

2024 - 2027 (Expected)

Projects / Experience

Serpent Shift (Solo Gameplay Programmer)

Tools: Unity, C#, Game Jam

- Developed core gameplay systems including wave spawning, enemy AI, and dual-mode combat (gun/melee).
- Built dynamic difficulty scaling and responsive player mechanics.
- Completed within 3 days for Mini Jam 196: Snakes.

Spectral Maze (Team Gameplay Programmer)

Tools: Unity, C#, Blueprint

- Implemented enemy AI, player token collection system, and core game rules.
- Collaborated with two teammates on level design and gameplay loops.
- Work-in-progress first-person horror prototype inspired by Dark Deception.

Slide & Dodge (Gameplay Programmer)

Tools: Unity, C#

- Designed dynamic 2D obstacle dodging mechanics for mobile.
- Obstacles spawn with varying rotations, creating unpredictable challenges.
- Focused on smooth controls and polished gameplay feel.

Volunteer / Achievements

- Donated blood in a community campaign.
- Participated in multiple game jams to practice fast iteration and creative problem-solving.

Hobbies & Interests

- Reading & storytelling media
- Traveling & exploring new cultures
- Anime & visual storytelling
- Video games & gameplay analysis
